ABOUT ME

Web developer with experience in modern technologies like Wordpress, Laravel, MySQL, Git, and Next.js. I have worked on interactive, user-optimized projects, including building responsive websites, customizing WooCommerce stores, and implementing innovative features. Additionally, I have competed in international events such as WorldSkills Costa Rica and WorldSkills Lyon 2024, where I showcased my technical skills under pressure. My focus is always on improving user experience through web development.

PROFESSIONAL EXPERIENCE

Wordpress developer

freelance - 2024

Redesigned and developed the Sierpe Mangrove Tour website by creating a custom WordPress theme. Improved the site's responsiveness, optimized the design, and configured WooCommerce for seamless tour bookings and online transactions.

- Wordpress
- Woocommerce
- Php

Frontend Developer

freelance - 2024

Developed the Ignite website using Next.js and Sass, focusing on performance, modern UI/UX principles, and a fully responsive layout. Implemented dynamic product filtering with React state management, ensuring an interactive and seamless user experience. Designed reusable components for product showcases, optimizing maintainability and scalability.

- Next.js
- Sass
- Git
